Project #2:

Project Name	BRAOU Examination Results Process
Application Type	Windows Standalone
Role	Software Developer
Organization	Dr. B. R. Ambedkar Open University
Team Size	1
Environment (with skill versions)	Technologies : VB.NET Database : MS Access 2003/2007 Development Tool : Visual Basics 6.0

Description:

BRAOU Examination Results Processing application was designed to process the valuation marks to get the results of various Courses. By using this application we can reduce the processing time and to improve the accuracy of the Examination results. Prior to implementing this, there was a significant burden of manual processing which was resulting in huge time delay and accuracy was always challenging due to the manual effort.

The application is useful for comparing the Exams registration data with valuation data. Rectify the problems raised during data comparison. Prepare the statistical data for the results committee. Finally data prepared to result declaration in website and the same data used for memos.

Responsibilities:

- ✓ Understanding requirements of BRAOU courses and designed UI.
- ✓ Responsible for Coding using VB.NET
- ✓ Responsible for Debugging and Unit Testing.
- ✓ Update the code to rectify the defects/new requirements.
- ✓ Retesting the cases where defect has been raised
- ✓ Regular review and revision of the code to update in order to addition of new courses
